

Dante Domain Manager™

More security, organization, scalability,
and control for Dante networks

Features

API for Dante Control

User Authentication in Dante Controller

Editable User Roles Permissions per Dante Domain

Encrypted control traffic

Configuration of domains, including across subnets

Real-time Dashboard and Alerts

Automatic discovery of all Dante devices (Dante Nodes)

Detailed audit log

Ability to share audio between Dante Domains

Advanced external clock synchronization

Dante Domains

Organize your Dante system into independent, non-interfering groups of audio and video devices called Dante Domains for a clear operational view of each space, across your entire network.

Monitoring, Alerts, and Audits

A real-time Dashboard and Alerts let you know about problems before they are problems. A complete Audit Log allows you to identify improper workflows, malfunctioning devices, and unwanted user actions quickly and definitively.

SMPT E 2110

Interoperability in Broadcast
Dante Domain Manager simplifies SMPTE 2210 management, allowing sync with house clocks and integration with Dante devices.

API

Integration and Automation Integrate Dante control into third-party products and services such as touch panels and monitoring software. Build automations that instantly configure your Dante network for any task, any workflow.

User Authentication and Roles

Manage the use of Dante Controller with user authentication and roles that restrict what each staff member or volunteer can see or change.

Expansion

Dante Domain Manager lets you use Dante over routed networks easily with no change in performance, expanding the range, size and reach of your AV-over-IP system

Security and Control that grows with you.

Get started with a Dante Domain Manager edition that suits your needs exactly. Dante Nodes (devices) and Dante Domains can easily be added to any Edition, and key features are available to purchase as add-ons.

Dante Domain Manager Editions

Gold Edition

Dante Domain Manager Gold Edition enables protection against unwanted changes to your system and allows you to deploy Dante over routed networks. The Gold edition features LDAP/AD integration and advanced audit log filtering along with support for 100 Dante Nodes and 20 Dante Domains with access to the Dante Managed API. This is perfect for schools, small businesses, houses of worship, recording and broadcast facilities as part of a comprehensive AV management strategy.

- Additional devices with Dante Node/ Dante Domain packs (20/4, 50/10 and 100/20 available)
- 20 Dante Domains
- 100 Dante Nodes

Platinum Edition

Dante Domain Manager Platinum Edition is Dante management for the largest mission-critical systems found in universities, stadiums, public spaces and corporate offices. Dante Domain Manager Platinum covers 250 Dante Nodes in up to 50 Dante Domains plus the API and delivers the same security and ease of use of the Gold edition with even more features, including SNMP support for rapid notification of issues and a High Availability mode that provides robust system redundancy in the event of failure.

The Dante Domain Manager Platinum Edition provides the complete feature set of Dante Domain Manager for ultimate peace of mind. Node + Domain packs allow you to expand your Dante system up to 1000 Dante nodes.

- Additional devices with Dante Node/ Dante Domain packs (20/4, 50/10 and 100/20 available)
- 50 Dante Domains
- 250 Dante Nodes
- Complete Dante Domain Manager Feature Set

	Gold	Platinum
Base Number of Dante Domains	20	50
Base Number of Device Nodes	100	250
API for Dante	•	•
Enhanced event and alert filtering for detailed audits	•	•
LDAP and Active Directory integration for user authentication	•	•
ADD-ON: High Availability redundancy for rapid recovery		•
ADD-ON: SNMP support for integration with existing alert monitoring system		•
ADD-ON: Additional Dante nodes – up to 1,000 Dante devices	+	+
